

Getting Established on the OPM Website with a Password

With this account you will be able to change your tax withholding, change your email address, change your mailing address, change the direct deposit information, view statements and more.

So to get started click <https://www.servicesonline.opm.gov/>. As an alternate, key in the general link www.opm.gov/retire and click Services Online on the right side directory. Then if you don't have a password, click on the "Forgot Claim Number or Password" and it will take you to the screen to apply for a password. While OPM says they will mail a temporary password to you in seven days, it will actually take two or three weeks. Then you just follow the instructions on the temporary password mailing that you receive.

When you receive your password and have access to Services on Line, you can elect to receive mailers electronically. Call or email me if you need any more information.
